

Amendments to the Claims

1. (Currently amended) A refrigerated cabinet (10) comprising ~~a~~ at least one rolling night blind ~~or blinds~~ and at least one goods compartment opening (14) adapted to be closed by means of the at least one rolling night blind in an operative position thereof ~~or blinds, said refrigerated cabinet being e.g. a refrigerated chest, a freezer chest, a refrigerated shelf cabinet or a freezer shelf cabinet, in which the~~ at least one rolling night blind ~~or blinds are~~ held in the rolled-up state in the inoperative position thereof, characterized in that ~~the~~ a support of the ~~rolling night blind or of~~ at least one of the rolling night blinds (1, 1') comprises at least one loose bearing (5) such that the at least one rolling night blind ~~or at least one of the rolling night blinds~~ (1, 1') can be supported so as to be slidable in a direction along the a longitudinal axis (20) of its a blind carrier shaft (4).
2. (Currently amended) A refrigerated cabinet according to claim 1, ~~comprising wherein the~~ at least one rolling night blind is two or more rolling night blinds (1, 1'), characterized in that the rolling night blinds (1, 1'), at least at ~~the~~ adjoining side portions thereof, have means (30) for connecting the rolling night blinds (1, 1').
3. (Currently amended) A refrigerated cabinet according to claim 2, characterized in that the means (30) for connecting the rolling night blinds (1, 1') are in the form of adhesive tape, hook-and-loop-type closure, or zip fastener ~~etc.~~
4. (Currently amended) A refrigerated cabinet according to claim 1, characterized in that the ~~or at least one of the~~ rolling night ~~blinds~~ blind (1, 1') has holes ~~and/or is perforated~~.
5. (Currently amended) A refrigerated cabinet according to claim 4, characterized in that the ~~or at least one of the~~ rolling night ~~blinds~~ blind (1, 1') is perforated in different manner in different portions across the area thereof.
6. (Currently amended) A refrigerated cabinet according to claim 4, characterized in that the ~~or at least one of the~~ rolling night ~~blinds~~ blind (1, 1') is formed with said holes ~~and/or perforations~~ in the upper portion thereof only.

7. (Previously presented) A refrigerated cabinet according to claim 4, characterized in that the holes are formed by perforating the night covering (1, 1') and/or by the material chosen for the night covering (1, 1').
8. (New) A refrigerated cabinet comprising:
 - a goods compartment (12) having an opening (14);
 - a rolling blind (1, 1') positioned to close the opening (14) in a first state and having a rolled-up second state; and
 - at least one loose bearing (5) in a recess (7), a roll of the rolling blind supported by the at least one loose bearing for rotation about a longitudinal axis 20 and longitudinally slidable.
9. (New) The refrigerated cabinet of claim 8 wherein:
 - the rolling blind is a first blind and the cabinet further comprises a second blind.
10. (New) The refrigerated cabinet of claim 9 further comprising:
 - means for connecting the first blind to the second blind.
11. (New) The refrigerated cabinet of claim 10 wherein:
 - the means comprises hook-and-loop type closure or zip fastener.
